

About us

Established in 1991, Cameo Curtains is a manufacturer, supplier and installer of stage curtains, large window drapes and tracks. We have supplied and installed in village halls, schools, churches, theatres, schools, colleges, hotels and venues throughout the UK.

We aim to provide a friendly professional service and deliver stunning, high quality curtains every time. We offer free site visits to discuss requirements and take measurements so that we're able to provide an accurate quotation. We only use high quality, fire-retardant, durable materials and heavy duty fixings to ensure curtains look stunning and last for years.

Quality fire-retardant materials and heavy duty tracks

Our materials include velvet, wool serge, drill, plus dim-out and blackout fabrics. All of our materials are fire retardant as standard and available in a variety of colours to suit all environments.

Each curtain can be fitted with ties, pockets, hooks or eyelets, supplied with or without lining and chain-weighted depending on individual requirements.

Our back-drops or cyclorama solutions include canvas, white filled cloth or sharks tooth gauze.

We also professionally install heavy duty tracks – designed to withstand the extra weight of large-scale curtains, electric motors and all appropriate curtain fittings if required. We offer tracks suitable for manual cord operation, walk-along, winch operation, or remotely operated motorised systems, depending on your budget and requirements.

Servicing, cleaning and re-flameproofing

Regular servicing and maintenance of tracks help your curtains to open and close smoothly, and ensures that your drapes function at their best during every performance. We also offer cleaning and re-flameproofing of curtains to help them stay looking as good as the day they were first fitted, and conform to current FR regulations.
