

[The circuit]

The National Defibrillator Network

If you are responsible for a defibrillator, please make sure you register it with us so that we know where it is in an emergency. Registration is quick and easy via [The Circuit](#). The Circuit will now replace our previous method of logging defibrillators on our 999 system.

[The Circuit](#) will also help you look after and maintain your defibrillator. You will receive regular reminders to check that your device is emergency ready and be able to connect with other guardians in your area should you wish for someone to check it when you are away.

It's quick and easy register, simply ensure you have the following details to hand:

- Defibrillator location and surroundings
- Brand, model and serial number
- Available time of use
- Pad expiry dates
- Assurance that it's emergency ready

Register [now](#), and help us to start saving more lives today.

**** If you have previously registered your AED site with The East Of England Ambulance Service please still continue to register your site on The Circuit, as our intention will be to migrate all existing registered sites onto this new network.**

If you have any questions or concerns please refer to the 'Frequently Asked Questions' that you will find at the bottom of the Register Your Defibrillator page!
